Senior Backend Engineer and Technical Lead with 8+ years building and scaling backend systems in Go and Node.js across startups and established companies in Indonesia, Singapore, and Malaysia. Deep expertise in distributed systems, API design (REST, GraphQL, event-driven), and cloud infrastructure (GCP, AWS). Track record of reducing downtime by 30%, cutting infrastructure costs by 30%, and mentoring engineers while shipping business-critical systems.

Core Competencies

- **Languages:** Go, JavaScript, TypeScript
- **Backend Frameworks:** Node.js, Express.js, GoFiber, NestJS
- **APIs & Messaging:** REST, GraphQL, Event-Driven Architecture (RabbitMQ)
- **Data & Search:** PostgreSQL, SQL & NoSQL, Redis, Firebase, Meilisearch
- **Cloud & Infrastructure:** Google Cloud Platform, AWS

Professional Experience

- **Kirimfresh.id** **Indonesia**
2025–Present
Technical Lead
 - Architected and developed backend system using Go (Fiber), PostgreSQL, Redis, RabbitMQ, and Meilisearch, applying a clean handler-service-repository pattern with dependency injection
 - Designed and maintained RESTful APIs and real-time features supporting order processing, product catalog, and delivery tracking
 - Led technical decision-making including system architecture, infrastructure choices, and performance optimization strategies
 - Managed end-to-end delivery lifecycle: backlog grooming, sprint planning, execution tracking, release management
 - Supported event-driven architecture using RabbitMQ for asynchronous processing (order events, notifications)
 - Integrated external services including payment gateways, Firebase FCM, and third-party APIs
 - Defined and enforced coding standards, API contracts, and development workflows across the team
- **Silentmode Sdn. Bhd.** **Remote, Malaysia**
2024–2026
Senior Software Engineer
 - Designed and delivered scalable backend solutions with a strong focus on performance, reliability, and maintainability
 - Solved complex technical problems by implementing tailored solutions aligned with product and business requirements
 - Defined and enforced coding standards and best practices, improving long-term maintainability across services
 - Led code reviews and mentored junior engineers, accelerating team capability and code quality
 - Provided production support within SLA, performing root-cause analysis to reduce recurring customer issues
 - Contributed to system architecture decisions, particularly around scalability and performance under load
- **TreeDots Pte. Ltd.** **Remote, Singapore**
2022–2024
Senior Backend Engineer
 - Diagnosed and resolved critical production issues, reducing downtime by 30% and improving overall system stability
 - Introduced automated testing, increasing test coverage to 90% and cutting regressions by 50%
 - Implemented caching strategies that reduced database queries by 50% and significantly lowered server load
 - Refactored legacy codebases, reducing complexity by 30% and increasing feature delivery speed by 25%
 - Integrated third-party APIs, enabling new services and contributing to 15% customer base growth
 - Built an "Issue Handling" feature for customer order problems, smoothing the customer support flow

- **BrainPoolTech Pte. Ltd.** **Remote, Singapore**
2020–2022
Back End Engineer
 - Evaluated and modernised the tech stack, reducing annual infrastructure costs by 30%
 - Optimised database queries and backend logic, improving response times by 30%
 - Implemented caching mechanisms to reduce database load and improve scalability
 - Worked closely with product managers and designers to translate business requirements into technical solutions
 - Contributed to sprint planning and retrospectives, helping maintain consistent delivery velocity
- **Cudy Pte. Ltd.** **Singapore / Batam, Indonesia**
2019–2020
Backend Engineer
 - Migrated legacy systems to more efficient technologies, improving maintainability and reducing technical debt
 - Designed and built RESTful APIs that increased third-party integrations by 60%
 - Improved application performance through query optimisation and caching strategies
 - Integrated external APIs to expand product features and business partnerships
 - Built a chatbot (Telegram and WhatsApp) for finding nearby tutors
- **Infopro Mandiri Solusi** **Batam, Indonesia**
2019
Software Engineer
 - Developed RESTful APIs that significantly expanded integration capabilities
 - Resolved production issues quickly, reducing downtime and improving application stability
 - Collaborated across teams to optimise API usage, improving response times by 20%
 - Contributed to internal knowledge-sharing sessions and technical workshops
- **Tellinet Teramedia Indonesia** **Batam, Indonesia**
2018
Software Engineer
 - Optimised backend services and database queries, reducing response times by 30%
 - Implemented client-side caching strategies, reducing server load and improving page load times
 - Collaborated closely with backend teams to improve API efficiency and system performance
- **Little Blue Planet Indonesia** **Batam, Indonesia**
2017–2018
Web Administrator
 - Managed Active Directory and Group Policy, improving access control and system security
 - Performed performance profiling and optimisation, reducing memory usage by 60%
 - Led internal knowledge-sharing sessions to upskill team members
- **Proweb Media Indonesia** **Batam, Indonesia**
2015–2017
Backend Engineer
 - Built and maintained backend services and RESTful APIs supporting multiple internal products
 - Improved backend performance, reducing resource utilization by 20%
 - Integrated third-party services to expand application functionality and revenue streams
 - Actively participated in agile ceremonies and cross-team technical discussions

Education

- **Politeknik Negeri Batam** **Batam, Indonesia**
2011–2014
Ahli Madya (Associate Expert / D3 Diploma) in Information Technology
 GPA: 3.3. Completed professional development in Information Technology; member of IT Organization in college.

Languages

- Bahasa Indonesia (native), English (professional working proficiency).

Certifications

- **NestJS - Zero to Hero Backend Development** – completed January 2026.
- **The Absolute Beginners Guide to Cyber Security 2026 - Part 1** – Udemy, 5 hours – completed April 2026.
